SUMMARY

Enthusiastic third-year B.Tech student in AI & Data Science at REVA University with skills in Python, C, Power BI, and web technologies (HTML & CSS). Experienced in building impactful AI projects like a Personal Finance Manager and Lodging Grievance System, with a keen interest in healthcare innovation, data-driven solutions, and real-world AI/ML applications.

PROJECTS

AI Based Grievance Lodging and Tracking System

- Designed and developed an AI-based grievance lodging system enabling users to submit and track complaints through a user-friendly interface.
- Implemented NLP techniques to classify and prioritize complaints, improving resolution efficiency and response tracking.

AI Powered Personal Finance Manager

- Built an AI-driven personal finance manager to help users track expenses, categorize spending, and manage budgets effectively.
- Integrated data visualization using Power BI and implemented basic predictive analytics for smarter financial decision-making.

Python based Digital Art Generator

- Developed an abstract digital art generator that creates unique, randomized patterns based on user inputs (e.g., shape type, color palette, and complexity).
 - Utilized Python's basic features like loops, conditionals, and randomization to produce visually appealing artwork, combining programming skills with creative design.
-

EDUCATION

B.Tech in Artificial Intelligence and Data Science

2022 - 2026

Reva University

Current CGPA(5th sem) - 9.38

Average CGPA - 8.8

SKILLS

- **Technical Skills:** Python , C , SQL , HTML , CSS
- **Languages:** English, Kannada , Hindi
- **Certifications:** Database Management System(NPTEL) , Python foundation(Infosys Springboard).
